Agenda	Details	Done By	Due Date
1	<p>SMU presented their progress update that the current client web page is ongoing but still required lots of support from ITU side in terms of the APIs. The index.html on the web page will handle registration and login; as for main.html will be the entire page that the process starts.</p> <p>ITU presented that they are currently still working on refining the APIs. Such as POST Movies or Songs upload/create, etc is still not available.</p>	All	-
2	<p>SMU requested that API to include (Rating no - need to have a post and get to the web service, initial request is to IMDB but PROF Ben Gan say that the basic requirement is that the user must be able to do the vote, sort by the ID and sort by popularity)</p> <p>SMU also requested that rank to be included to the</p>	All	-

	user account – this is to identify the user whether they are the admin user or registered user. (ITU suggested that the rank to be tied together with the account)		
3	SMU informed ITU that they would have to create a WSDL Description Specifications and upload to the WIKI. This is needed, as it is part of the submission.	ITU	11 Apr 2013
4	SMU reported that the Test Plan to test out between the Client and Back End side would be created. The testing plan will be using the format that is given by Prof. It should include detailed information on which function we are testing, the expected outcome and real outcome.	All	-
5	The next due date for everything to be up is on 11 Apr 2013.	All	-

The meeting was adjourned at **SMU – 5.00pm / ITU – 10.10am**. These minutes will be circulated and adopted if there are no amendments reported in the next three days.
